CAREER HIGHLIGHTS

- **Mobile Development** | Profound expertise in designing and customizing applications and systems for the simplicity of their use combined with excellent analytical skills required for overseeing the entire technological infrastructure.
- **Technologies & Innovations** | Successful history of resolving complex technical matters with business and creative technical solutions. Experienced in the use of systems as well as setting the organization's IT strategy and defining systems and technologies required for its goals and objectives.
- **Organized & Motivated** | Skilled in maintaining order. Able to seamlessly multi-task long and short-term priorities to generate desired results. Ability to work independently and be self-disciplined in a virtual work environment.

PROFESSIONAL EXPERIENCE

Alleima – Scranton, PA + Remote

2013 – Present

Integration Architect | Full-time

- Tasked with developing and designing hundreds of system integrations between business applications for over a dozen locations across North and South America using a wide range of technologies.
- Created Web Services using REST/SOAP APIs and .NET C#.
- Managed Big Data by developing reports and data warehouses using multiple data sources.
- Managed and implemented a number of industry leading business applications.
- Assisted in creating a large customer facing mobile website used for eCommerce.
- Tasked with leading multiple large scale IT projects and budgets on a yearly basis.
- Assisted in troubleshooting high priority tickets around our global ERP system.
- Spoke at multiple tech conferences highlighting our technology usage and strategies.
- Provided valuable input on global integration management at Alleima's HQ in Stockholm Sweden.
- Implemented Disaster Recovery plans and contributed to the CI/CD Pipeline by implementing a Git Version Control system on large scale business applications.
- Created JSON & XML Business Object Documents (BODS) conforming to industry XML standards (OAGIS).

Talen Energy, Susquehanna Nuclear Power Plant – Berwick, PA

2012

Web Designer | Internship

- Created websites for the Effluents & Plant Security Departments using JavaScript, HTML, and CSS.
- Implemented network security measures to protect data, software, and hardware; continually passed quality control audit checks.
- Proctored training seminars to aid PPL employees with their yearly training software; used problem-solving skills and extensive knowledge of operations to provide direction and accurate answers.
- Recipient of the PPL Well-Rounded Employee Scholarship.
